

DevOps Engineer

Job Description:

We are looking for an experienced engineer to lead our DevOps efforts in building and scaling services in our Azure environment and assist customers on-premise / cloud environments in relation to our suite of applications. The role will work closely with software, data/AI, and automation teams to mature our infrastructure, deployment, monitoring and Q&A.

You will be working on a project using the latest technologies. The usage of the latest technologies combined with the freedom and expectation of introducing new technologies will make your daily work exciting and challenging. You will work in an agile environment closely cooperating with our Chief Technology Officer and Product Team.

You will facilitate the maintenance and further development of the tooling used by our developers and testers as well as the tooling we use to deploy and monitor our applications. Moreover, you will help us define security policies and assist other teams assessing potential risks on their deliverables.

Responsibilities:

- Continuous Integration and Continuous Delivery for all our internal developments
- Provide insights into scalability and maintenance to Software Engineers
- Implement solutions for automated provisioning of servers and scaling
- Build and maintain our production infrastructure to ensure scalability and high availability while maximising development team efficiency
- Setup, create, automate, manage and execute application builds, packaging and deployments.
- Perform automated deployments to create new or update existing DTAP environments.
- Be responsible for packaging and distribution of our custom software libraries
- Source code and Version control management.
- Analyse, troubleshoot and resolve configuration, build, package and deployment failures.
- Support internal and external customers on multiple platforms
- Works with customers and other teams to troubleshoot customer environments to increase user satisfaction.
- Create, update and maintain all necessary documentation
- Drive continuous service and process improvements
- Drive and manage our use of ITIL processes
- Collaborate, coordinate & communicate with various stakeholders as needed including 3rd party vendors.

Requirements / Skill set:

- At least 3 years of working experience in complex environments in a similar position
- Significant Azure experience is preferred, AWS and Google Cloud acceptable.
- The ability to use a wide variety of (open source) technologies and tools. You are able to select, deploy and maintain the tools required to optimise our development processes
- GitHub experience is preferred, GitLab and SourceForge acceptable
- Container Orchestration and Containerization technologies (Kubernetes, Docker)
- Continuous Integration, Delivery & Deployments (GoCD, Jenkins)
- Data Engines (SQL, NoSQL, ElasticSearch, Object Storage, Block storage)
- .Net and .Net core

- Scripting languages such as Python, Bash, NodeJS/Javascript, etc
- Agile way of working. You love ownership; you design it, you build it, you own it!
- The ability to code and script;
- Experience with systems and IT operations;
- Comfortable with frequent, incremental code testing and deployment cycles;
- A strong grasp of automation tools. You understand what and when to (or not to) automate and are able to make objective cost/benefit assessments of your proposed automations;
- A drive to improve both yourself and the quality of the work you deliver; you like to be at the cutting-edge of the technologies you work with;
- Comfort with collaboration, open communication and reaching across functional borders;
- Fluency in English, both oral and written, and excellent communication skills;
- Ambition, energetic and an entrepreneurial drive, you can work well independently but also in a team and you are fun to work with.

Interpersonal / soft skills:

- Strong sense of accountability and ownership.
- Good team player and communicator with a flexible, customer-driven attitude.
- Agile / Lean attitude and mindset.
- Believe in daily improvement, easily adapt to change and have fun while doing it.
- Work well independently and within a team.
- Ambition to grow through experience, curiosity to understand new technologies.
- Ability to work cross-culturally and across regions

Our company and benefits

This is an opportunity to join a quickly growing team and make a substantial impact at our company. We're looking for someone that can learn, adapt, and roll with a fast-paced, ever-changing environment and who isn't afraid of uncertainty. We are informal, innovative, ambitious and professional company. A change to work within a successful, dynamic and growing organization, with a matching company spirit

Awesome office in Amsterdam. We are located at the 19th floor in the Alpha Tower building, with a great view and right at the Amsterdam Arena train- and metro station.

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.
